FOC DEFINED

Capt Wilson

4th EOM WIPT #3

22-24 May 2001

Session Objective

Definition of FOC……WIPT's vision of the capability (end state) required to centrally manage 4th EOM for selected components

Objectives of 4TH EOM Effort

- Increase operational availability of weapon system to warfighter
- Reduce logistical footprint
- Standardize and reduce the variety of tools, support and test equipment
- Reduce administrative delay time in maintenance process
- Standardize processes and reduce tasks in our maintenance process

Centralized Management Responsibility

- Identify Source of Repair for selected SecReps
- Establish and Manage Enterprise-Wide Contracts
- Centralized Visibility of Outsourced Maintenance
- Identify and Mitigate Potential Risks
- Standardize and streamline processes, where required

FOC Defined

“ A validated process and enabler requirement that allows for the migration of the centralized management of Fourth Echelon Maintenance of selected components to MARCORMATCOM.”
